

International Symposium on Low Carbon & Renewable Energy Technology

From 15 to 18 November 2010, Hann-Ocean participated in the ISLCT2010 held on Jeju Island, Korea. This annual event is co-organized by the leading minds in the renewable sector from China, Japan and Korea. Hann-Ocean, being very active in research and development of clean energy devices, participated in this event to benefit from the immense concentration of knowledge in one place and to educate visitors about their DRAKOO and Hexifloat devices. Once again, Hann-Ocean managed to catch the attention of the expert visitors with its unique product designs. Many people in the conference were excited by the breakthrough Hexifloat design

Henry Han was one of the invited speakers at the conference and gave the audience an introduction to DRAKOO and Hexifloat. Furthermore, we are honored to inform you that Henry Han and Anita Hodnungseth's paper introducing Hexifloat won the Best Paper Award for its outstanding contribution to the symposium.

ISLCT2010

Best Paper Award

The Program Committee and The Award Committee of ISLCT2010 have selected the following paper as the best paper for its outstanding contribution to the symposium.

INTRODUCTION OF HEXIFLOAT - A 4-in-1 RENEWABLE ENERGY FLOATING PLATFORM

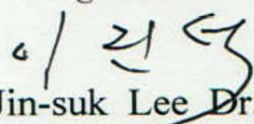

Henry Lei Han and Hanne Anita Hodnungseth

¹ Hann-Ocean Technology Pte Ltd, Singapore

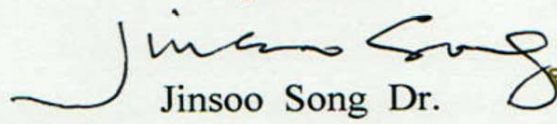

November 17, 2010
